With no battery to weigh it down, the Razer Mamba HyperFlux weighs in at just 96 g, a weight traditionally only achieved by wired gaming mice. Easily lift and reposition this ultra-lightweight wireless gaming mouse during intense fast-paced games and over extended periods of time.

Equipped with a true 16,000 DPI 5G optical sensor and Razer's proprietary Adaptive Frequency Technology\* for unparalleled wireless signal stability, the Razer Mamba HyperFlux allows for swift and exact mouse movements.

We're pushing the limits to what a gaming laptop can do. The Razer Blade Pro 17 is built with a powerful processor to run performance-demanding AAA games on the go. We've made it nearly 25% smaller than its predecessor, with a faster 17.3" display that's fitted into a body as sleek and compact as a 15" laptop.

The 10th gen Intel® Core™ i7-10875H processor pushes the limits even further. With a base clock speed of 2.3GHz and 5.1GHz Turbo Boost on the new 8-core processor, the Razer Blade Pro 17 is powerful enough to take on the latest AAA titles while delivering productivity performance when needed.

Equipped with 7.1 surround sound software so you can experience accurate positional audio when gaming—you'll be able to pick up the direction of where the action is coming from so you're ready to pounce into a gunfight. Featuring custom-tuned 40mm drivers, the Razer Kraken X produces clear and balanced sound from thundering explosions in all-out wars to subtle footsteps in stealthy covert operations.
